

Ex:7 Create an Android Application with Two Buttons to Parse XML and JSON Files and Display the Parsed Data in Their Respective Layouts Side by Side.

Activity_main.xml

student.xml (assets)

```
<?xml version="1.0" encoding="utf-8"?>
<student>
    <name>Reema Sweety</name>
    <department>CSE</department>
    <year>Final Year</year>
</student>
```

student.json (assets)

```
{
  "name": "Reema Sweety",
  "department": "CSE",
  "year": "Final Year"
}
```

OUTPUT
